Tejaswini Giripunje

Senior SDET | Performance Engineer | QA Automation Engineer

Pune, India | +91 7447374100 | tejaswinigiripunje99@gmail.com | linkedin.com/in/tejaswinigiripunje

PROFESSIONAL SUMMARY

Senior SDET and Performance Engineer with 5+ years of experience testing large-scale enterprise and banking applications. Specializes in performance engineering (JMeter, LoadRunner, NeoLoad, BlazeMeter), test automation (Selenium, Python, pytest, Java, JavaScript) and REST/SOAP API validation (Postman, SoapUI, ReadyAPI). Uses Dynatrace, Splunk, AppDynamics, Prometheus and Grafana to find bottlenecks and deliver clear root cause analysis. Works closely with Agile development, DevOps and support teams on AWS, Azure and Kubernetes environments.

KEY ACHIEVEMENTS

- Designed and executed load tests with JMeter, ramping from 1,000 to 2,000 concurrent users and sustaining about 950 TPS at 1,000 users with P95 under 500 ms.
- Identified the saturation point at about 1,500 to 2,000 users, where P99 latency doubled (1.35 s to 2.2 s) and error rate rose from 1.8% to 4.5%.
- Analyzed avg, P95 and P99 response times and throughput to find bottlenecks in the application, database and connection pools.
- Tuned thread pools, queries and caching, improving peak capacity by 30% and holding error rate under 1% at 1,500 users.
- Ran stress and soak tests with Grafana and Prometheus monitoring, and delivered capacity reports to dev and business teams.

TECHNICAL SKILLS

Performance Testing: Apache JMeter, LoadRunner, NeoLoad, BlazeMeter, Workload Modelling, Baseline, Load, Stress, Spike, Soak/Endurance, Volume, Scalability and Capacity Testing

Performance Analysis: Response Time, Throughput, TPS, Concurrent Users, P90/P95/P99, Error Rate, SLA/SLO Validation, Bottleneck Analysis, Root Cause Analysis (RCA)

Test Automation: Selenium WebDriver, Python, pytest, Java, JavaScript, Groovy, C#, Automation Frameworks, Automated Regression Suites

API Testing: Postman, SoapUI, ReadyAPI, REST, SOAP, JSON/XML Validation, Authentication (Bearer Token, API Key), Negative Testing

Monitoring / APM: Dynatrace, Splunk, AppDynamics, IBM Instana, Prometheus, Grafana, AWS CloudWatch, Log Analysis

Cloud and DevOps: AWS (EC2, EKS), Azure, Kubernetes, Docker, Pivotal Cloud Foundry (PCF), Jenkins, CI/CD, Git

Databases and OS: SQL, Oracle, Linux/Unix, Windows

QA and Delivery: SDLC/STLC, Test Planning, Functional, Integration, Regression, Smoke, Sanity and Security Testing, Defect Lifecycle, Agile/Scrum, Jira, Confluence, ServiceNow

PROFESSIONAL EXPERIENCE

Senior Performance Engineer (Performance and Test Automation) — September 2021 - Present

Wipro | *Pune, India*

- **Performance testing:** Design and run baseline, load, stress, spike, volume and 8-24 hour endurance tests with JMeter, LoadRunner, NeoLoad and BlazeMeter to validate scalability, stability and reliability.
- **Analysis and reporting:** Compare response time, throughput, TPS, error rate and P90/P95/P99 results against SLA/SLO targets, and share clear recommendations with stakeholders.
- **Root cause analysis:** Correlate test results with Dynatrace, Splunk, AppDynamics, IBM Instana, Prometheus and Grafana data and SQL/Oracle queries to isolate bottlenecks and recommend code, configuration and scaling improvements.
- **Test automation:** Build and maintain automation frameworks and regression suites using Selenium WebDriver, Python, pytest, Java, Groovy and JavaScript, reducing manual effort and release turnaround time.
- **API testing:** Automate REST/SOAP functional and performance tests with Postman, SoapUI and ReadyAPI, validating XML/JSON payloads, authentication, response times and service-level compliance.
- **Scripting:** Write Python scripts for test data generation, API validation and performance result parsing and reporting.
- **CI/CD and cloud:** Maintain Jenkins and Git pipelines for automated build and test runs, and monitor applications on AWS, Azure, Kubernetes and PCF (CPU, memory and thread usage).
- **Collaboration:** Work with development, DevOps, database and infrastructure teams on defect triage, release readiness and status reporting in Agile sprints using Jira.
- **Documentation:** Maintain test plans, dashboards and RCA documents in Confluence for knowledge sharing.

KEY PROJECTS

Web Application Performance Testing and Optimization

Tools: JMeter, LoadRunner

Ran load, stress and capacity tests to improve application responsiveness and identify system limits.

API Load and Functional Testing Framework

Tools: JMeter, BlazeMeter, Postman, SoapUI, ReadyAPI

Built a framework for continuous REST/SOAP API performance and functional validation.

End-to-End Automation and Regression Suite

Tools: Selenium WebDriver, Python, JavaScript, Jenkins, Git

Developed automated regression tests integrated into CI/CD to increase coverage and reduce manual effort.

Cloud Application Performance Monitoring

Tools: Dynatrace, AppDynamics, Prometheus, AWS, Azure, Kubernetes, PCF

Set up real-time monitoring of applications on cloud and containerized platforms to spot performance issues early.

Performance Dashboard and RCA Documentation

Tools: Confluence, Jira, Grafana

Created centralized reporting for performance metrics and root cause analysis to share results across teams.

EDUCATION

M.Tech, Software Systems | Birla Institute of Technology and Science (BITS), Pilani **2025**

Bachelor of Computer Applications (BCA) | RTM Nagpur University **2021**

CERTIFICATIONS

- Certified JMeter Performance Tester
- Splunk Core Certified User
- Postman API Fundamentals Student Expert
- AWS Cloud Practitioner Essentials

ADDITIONAL INFORMATION

- **Domain Experience:** Banking
- **Recognition:** Received an Exceptional Performance certificate from the client.
- **Languages:** English, Hindi and Marathi (fluent, professional proficiency).
- **Availability:** Currently serving notice period; can join within 30 days. Open to relocation; seeking full-time roles on hybrid or remote basis.
- **Leadership:** Organized and led the event Tarang.
